

Custom manufacturing of iron-concrete sets of street and railway weights

07 Čerčany

Trademark	Dimensions (cm)			Weight (kg)
	L	B	H	
ZV 009	600 - 2400	*	*	max 8 000

Usage:

* – as per the project documentation, without any limitations

The prefab iron-concrete base of street weights features modular design with module width 6, 8 and 9 meters. Prefab base is put on a compacted bed which enables a quick assembly within a couple of hours with minimum construction cost. Prefabrication allows for an easy future relocation or extending a current weight.

The foundation can be split as per vehicle drive in as follows:

- prefab drive in base
- prefab combined base
- prefab level base

An exclusive supplier of street and railway weights is:

TAMTRON s.r.o.

U Dýchárny 1162, 278 01 Kralupy nad Vltavou,

that can do the assembly of weighbridge including a standard evaluation and indication unit or the software indicator SCALEX DWI installed at an ordinary PC including the additional component ScalexPC. Tel. 315 733 201, Fax 315 733 202
